

## Technical Product Information

### TP-1 Calcium EP-SW – Aerosol Cans, 400ml

#### TP-1 Calcium EP-SW

Lubricant and corrosion protection even in seawater atmosphere.

#### Areas of Application

##### TP-1 Calcium EP-SW

is a mineral oil-based lubricant with calcium soap. Also possible with extreme pressure loads thanks to special EP additives.

##### TP-1 Calcium EP-SW

is ideally suited for the lubrication of moving parts in sea water atmosphere. Particularly suitable as a lubricant for steel ropes, cranes and winches that are exposed to sea water or aggressive environmental conditions.

##### TP-1 Calcium EP-SW

Long lasting corrosion protection grease for components even in direct contact with seawater.

#### Application examples

Winches, screws, threaded spindles, offshore shipyards, yachts, busbars, distributors, roller and slide bearings, pumps, turbines, marine systems, mooring lines, cranes, car washes, etc.

#### Characteristics

- Very good resistance to salt water
- Excellent corrosion protection even against salt water
- Wear protection through EP additives (Extreme Pressure)
- Corrosion protection: for indoor storage for up to 2 years, for outdoor storage for up to 1 year

#### Data

Type	Unit	Value	Standard
Thickener		Special Calcium Soap	
Base oil		Mineral oil	
Colour/ Appearance		brown	
Kinematische Viscosity by 40°C	mm <sup>2</sup> /s	approx. 100	DIN51562
Kinematische Viscosity by 100°C	mm <sup>2</sup> /s	approx. 9	DIN51562
Working temperature range	°C	-25 – 80	
Propellant		Butane, Propane
